

Making Healthy Living Easier

Partnerships to Improve Community Health (PICH)

The Centers for Disease Control and Prevention (CDC) continues to improve the health and wellness of Americans through the PICH program. PICH is a 3-year initiative that supports implementation of evidence-based strategies to improve the health of communities and reduce the prevalence of chronic disease.

PICH builds on a body of knowledge developed through previously funded CDC programs and encourages collaborations with a multi-sectoral coalition to implement sustainable changes in communities where people live, learn, work, and play.

Chronic Disease Burden in the United States

In the United States, the chronic disease burden is growing at a significant pace. More than half of American adults have at least one chronic disease, and 7 of 10 deaths are caused by chronic diseases. In addition, care and treatment of chronic diseases account for 86% of the nation's health care costs.

Obesity and many chronic diseases, including heart disease, cancer, stroke, and type 2 diabetes, are preventable. PICH addresses risk factors that contribute to these conditions:

- Tobacco use and exposure.
- Poor nutrition.
- Physical inactivity.
- Lack of access to opportunities for chronic disease prevention, risk reduction, and disease management.

Approach to Improving Health

PICH awardees are implementing population-based strategies, tailored to individual community needs, across various settings (community institutions/organizations, health care facilities, schools, and worksites), to create greater access to healthier environments.

With the goal of reducing chronic disease prevalence and related risk factors, PICH is expected to improve health outcomes for people across the country.

Examples of community strategies include:

- Protecting people from secondhand smoke exposure in indoor and outdoor spaces.
- Promoting nutrition guidelines that encourage healthy food and beverage options in schools and worksites.

PARTNERSHIPS TO IMPROVE COMMUNITY HEALTH

- Increasing physical education classes so children have more physical activity opportunities each day.
- Increasing the number of multi-disciplinary teams (i.e., physicians, pharmacists, community health workers) that help patients manage their chronic diseases.

Awardees

PICH awards will total \$150 million over 3 years. PICH funds a variety of governmental agencies and nongovernmental organizations, including school districts, local governments, hospital and health

systems, community-based organizations, public health offices, and American Indian tribes/tribal organizations.

In FY 2014, CDC awarded \$49.3 million to 39 awardees representing three designated geographic areas, including:

- \$30.9 million in awards to 13 large cities and urban counties with populations of 500,000 or more.
- \$14.2 million in awards to 20 small cities and counties with populations between 50,000 and 499,999.
- \$4.2 million in awards to six American Indian tribes/tribal organizations.

LARGE CITIES AND URBAN COUNTIES

State	Locality	Awardee	Award Amount
California	Cities of Anaheim, Garden Grove, and Santa Ana	Community Action Partnership of Orange County	\$1,385,251
	Santa Clara County	County of Santa Clara	\$1,901,813
	Fresno County	Fresno County Department of Public Health	\$1,585,154
	City of Los Angeles	Los Angeles County Office of Education*	\$3,600,000
Florida	Broward County	Broward Regional Health Planning Council, Inc.	\$1,719,743
	Pinellas County	Pinellas County	\$866,517
	Miami-Dade County	Miami-Dade County	\$3,353,274

Adopt a Resolution to Accept a Partnerships to Improve Community Health (PICH) Grant from the County of Santa Clara in the amount of \$35,000 (Staff Contact: Renee Lorentzen, 586- 3409)

Background: The City of Milpitas applied for and won a Partnerships to Improve Community Health (PICH) Grant in the amount of \$35,000 from the County of Santa Clara. This grant encourages programs and collaborations to implement sustainable changes in communities where people live, learn, work, and play. Through this grant, City staff will be working on healthy eating programs and education for youth and for City employees, encourage physical activity and active transit by establishing and promoting a Safe Routes to School program and increasing exposure to the City's bike routes, trails and parks.

Funds from the grant will be used for staff time, materials and marketing to facilitate the grant.

Fiscal Impact: None.

Recommendation: Adopt a Resolution to Accept the Partnerships to Improve Community Health Grant from the County of Santa Clara in the amount of \$35,000.

☒ Check if City Council Approval required.
